

AJA MiniConfig Release Notes—v2.9.4

Control Software for AJA Mini-Converters

General

This release is recommended for users of LUT-box, HA5-Plus, and ROI. It contains improvements and fixes for those products only.

Improvements

LUT-box

- Fix to ensure correct initialization of LUT processor on power up
- Fix to ensure correct initialization of video processor on cold power up

HA5-Plus

- Fix to improve operation with RGB Full and SMPTE range, based on Video Capability Block
- Fix to ensure correct color space is maintained when input RGB color range controls are set to Full or SMPTE, but actual input is Y, Cb, Cr
- Fix to ensure correct color phase is maintained when switching between RGB and Y, Cb, Cr input data

ROI

- MiniConfig changes to improve behavior when power cycling, connecting and disconnecting USB connection

Installing the Latest Software

Mini-Converters come from the factory with pre-installed firmware. To ensure that you have the most current version of software/firmware available, please refer to the AJA website. To get the latest version, visit the MiniConfig page on the AJA website:

<http://www.aja.com/en/products/mini-converters/mini-config-software/>

The MiniConfig software files can be selected to download for configuring and upgrading your Mini-Converter module. Current and past releases of the MiniConfig software are also available in the Software Archive section for each supported Mini-Converter.

Firmware Upgrade Procedure

The manual provided with your AJA Mini-Converter describes the firmware update process; please refer to it in order to properly update your firmware. The product manuals are also installed with the software in the /AJA/MiniConfig/Documentation/ folder.

Individual product manuals are available online for download from the Mini-Converter section of the AJA website:

<http://www.aja.com/en/support/>
